EB08109 - Goat Anti-ABHD4 (aa 304 to 316) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: ABHD4, abhydrolase domain containing 4, FLJ12816

Official Symbol: ABHD4

Accession Number(s): NP_071343.2

Human GeneID(s): [63874](#)

Non-Human GeneID(s): 105501 (mouse)

Immunogen

Peptide with sequence C-QRPDSYVRDMEIK, from the internal region of the protein sequence according to NP_071343.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx 48kDa band in Human Brain (Cerebellum, Cerebellar Cortex, Frontal Cortex) lysates and in Mouse Brain lysates after 0.5µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 38.8kDa according to NP_071343.2. The 48kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog
